

modes seen at $y=0$:

———— $j = \pm 2: m^2 + 4/R^2$

———— $j = \pm 1: m^2 + 1/R^2$

———— $j = 0: \phi_0, \text{ mass}^2 m^2$

kernel = $\coth(\pi R q)/2q$, $q^2 = k^2 + m^2 - \omega^2$
